RI TRANSPARENCY REPORT

2019

Karoll Capital Management

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2019 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

Karoll Capital Management is a long-only asset manager investing in listed equities with a focus on Emerging Europe. We believe Emerging Europe offers excellent investment opportunities as the regional economies are set to grow faster than the Eurozone and given local stock exchanges' early stage of development. We have a long-term investment horizon, typically at least 3 years. Each of our investment products is managed by a separate Portfolio Manager. In making asset allocation decisions, the PM is supported by an eight-member Investment Committee. The team debates and decides on the asset classes comprising the portfolio, as well as the geographic and sector splits. The stock selection is performed by the fund's PM with the help of a seasoned analyst team. We have the freedom to deviate from local indices based on our views.

In narrowing our investment universe, we apply five layers of stock selection filters; 1.) market cap & liquidity; 2.) corp governance, transparency, ESG; 3.) sector outlook & company competitiveness; 4.) financial strength; 5.) in-house valuation. We use proprietary research to identify "hidden gems". We believe that responsible investing can lead to superior returns in the long term.

SG 01.5

Provide a brief description of the key elements, any variations or exceptions to your investment policy that covers your responsible investment approach. [Optional]

Karoll Capital Management aims to achieve better risk-weighted returns compared to the benchmarks through responsible investing. We believe that consideration of environmental, social and governance factors can help us achieve better returns in the long term and therefore we incorporate ESG issues into investment analysis and decision making processes. We apply the ESG filter as one of the first one to narrow our investment universe. We believe that incorporating the ESG filter can substantially reduce the investment risks. ESG screening is conducted internally.

When constructing investment portfolios we exclude companies generating majority of their revenues from the tobacco, weapons and pornography sectors. We make an assessment of the company's practices in addressing environmental and social issues in its operations.

--------	-----------	--------	---------------	-------

LEI 05.1

Indicate which processes your organisation uses to ensure screening is based on robust analysis.

- Comprehensive ESG research is undertaken or sourced to determine companies' activities and products.
- Companies are given the opportunity by you or your research provider to review ESG research on them and correct inaccuracies
- External research and data used to identify companies to be excluded/included is subject to internal audit by ESG/RI staff, the internal audit function or similar
- Third-party ESG ratings are updated regularly to ensure that portfolio holdings comply with fund policies.
- Trading platforms blocking / restricting flagged securities on the black list
- A committee or body with representatives independent of the individuals who conduct company research reviews some or all screening decisions
- A periodic review of the quality of the research undertaken or provided is carried out
- Review and evaluation of external research providers
- Other, specify
internal procedure
- None of the above
